BOARD OF REGISTRATION AND STATISTICS.

FIRST REPORT.

OFFICE OF REGISTRATION AND STATISTICS,

15th August, 1853.

To the Honorable MALCOLM CAMERON,	} <i>Members of the Board of Registration and Statistics.</i>
“ “ A. N. MORIN,	
“ “ E. P. TACHÉ,	

GENTLEMEN,—In compliance with the request of the Honorable the Chairman of your Board, I have the honor to present my First Report upon the Census of 1851. Its very incomplete state will, at the present time, compel me to deal very generally with some of the subjects embraced, as the only parts really perfected are the Returns of the Origins, the Religions, and the Agricultural Produce of both Provinces.

An immense amount of work has been performed in the Office, as will be shewn hereafter, but until the Abstracts of each portion are completed, it will be impossible to draw any accurate deductions, or compile such comparative Tables as will necessarily suggest themselves.

Before entering upon the results of this great work, it will be well perhaps to make some observations as to the machinery whereby so much valuable information has been collected and condensed.

In the months of November and December, 1851, the Commissioners for each County and City in the Provinces received their appointments, and at once proceeded to select a sufficient number of Enumerators for their respective localities. In the performance of this there were employed in Upper Canada, 45 Commissioners and 597 Enumerators; in Lower Canada, 38 Commissioners and 476 Enumerators. To each were furnished printed instructions with “Forms” of Schedules ready filled up for their guidance.

The Census is supposed to have been taken on the 12th day of January, 1852, and great credit is due to most of the parties engaged for the prompt and efficient

manner in which their duties were discharged. On the whole the Census of Lower Canada has been taken with greater care than that of the Upper Province, where, unfortunately, many of the Enumerators proved themselves wholly unfit for the duties assigned to them; and the negligence and ignorance displayed in the work of these has added materially to the labours of the Office, in the classification and arrangement of the Tables. From this charge, however, a great number of the Counties are wholly exempt, and in many the work has been performed most admirably by both Commissioners and Enumerators.

In reference to the degree of accuracy which may be attributed to the Returns, it must be borne in mind that they are chiefly dependent on voluntary information,—tested, however, to some extent by the observation and local knowledge of the Enumerators. It is, however, a curious fact, and one to which most of them bear testimony, that a very general feeling was found to prevail throughout the Colony, that the Census had some direct or indirect reference to taxation—and in this belief the Enumerators were frequently received most ungraciously, and the information sought was, not only partially, but, in some cases, altogether withheld. It is much to be regretted that the value of this important work which displays the progress of a Colony, in which the elements of improvement are working with such increasing and almost unexampled energy, and which affords the only available means of satisfactorily proving the production, distribution, and consumption of its natural wealth, and the moral and physical condition of its people, should have been thus to some extent counteracted by ignorance and prejudice. It is, however, an evil which exists in other Countries, and in taking the last Census of the United States, it became necessary, in some districts, to put in force the Act of Congress for refusal to reply to the Interrogatories of the Enumerators. The only remedy for this, perhaps, is to be found in the increasing intelligence and education of the community.

With reference to a similar work in another Country, it was remarked that “People are slow to see that questions relating to themselves and their households can have any bearing on the general good, and forget that, in accounts of large numbers, the individual is wholly lost sight of in the average, but that the average can only be obtained by an accurate knowledge of all that pertains to the individual.”

In all countries, the interval between the taking and publishing of a Census is thought to be unnecessarily long, and at this time the complaint is made respecting that of Great Britain and the United States. Of the former, taken as that of Canada for 1851, the details of the numbers and distribution of the population alone were published, and we are told that all the information collected relative to the Ages, Occupations, Civil condition, and Birth places of the population, with the number of the Blind, the Deaf, and the Dumb, will not be published for a considerable time. In the United States, where the Census was taken in 1850, we believe that the publication is confined to General Abstracts, and that no detail has, as yet, been given to the public. In fact, the Abstracts have only very recently been published.

It must not be forgotten, that the materials for a Census are obtained by means of a personal return from each family, and each of such returns has to be passed in

review, and checked, before any of the tables can be prepared. The following remarks may give some little idea of the labour this involves :

The Returns were with a few exceptions sent by the Commissioners through the medium of the Post Office, (and of the immense bulk of papers thus transmitted not one was received at the Office in a mutilated condition, or in any way injured.) The first Returns were received on the 28th of February, 1852, from the City of Hamilton, and the County of Lotbinière, and from that time the most difficult part of the Office work commenced.

The population of the two Provinces amounts to,.....	1,842,265
That of the Cities and Towns was taken on slips, left at every house,	171,034
That of the Counties and Villages, on sheets of 50 each,.....	1,671,231

giving 33,425 sheets, each containing 40 columns which had to be carefully examined and analysed, being no less than 1,337,000 columns, and averaging the slips at eight each, we have 21,380 slips, which had to be submitted to the same test. In addition to these, the Agricultural Returns occupied about 7000 sheets of 55 columns each, making a total of 1,722,000 columns and 21,380 slips.

The mode of proceeding in the analysis was as follows :—

1st. *Personal Census.*

The first duty was to examine every sheet to ascertain if the classification as to Origins and Religions, given in the Abstracts furnished by the Commissioners, were correct, and in many cases very great discrepancies were discovered; in others where no Abstract had been furnished by the Commissioners, they were prepared in the Office. This portion of the Census alone, which is published, occupies 143 pages of printed matter, and on reference to this the immense amount of labour bestowed upon it will be apparent, each Municipality being entered separately. In this part of the work there are 1755 columns and 2178 cross castings.

The trade or occupation of every individual was then extracted from each sheet, and classified as to Counties and Townships.

The most difficult and tedious part of the work has however been the classification of the Ages, Births, Deaths, Number attending School, Deaf, Dumb, Blind, Lunatics, Number of Families, Members and not Members of Families, of each Municipality—and the arrangement occupies no fewer than 150 columns, and was rendered the more difficult and tedious as it was necessary to distinguish the Married and Single, the Widows and Widowers, and the ages at which the deaths occurred.

Two persons working the whole day could, in some cases, analyse 3000 names,—and in others not more than 2000, according to the correctness with which the Returns were made—and where the Married and Single were not distinguished in the Enumerators sheets, in the column for that purpose, not more than 1000 names could be taken. Taking the average however at 2500, and this was found to be the aver-

age of two of the most rapid and attentive Clerks in the Office, the analyzation of this part alone would occupy two Clerks over 700 days.

These Abstracts, when made, had to be entered in a tabular form,—examined, proved, and prepared for the printer. This part of the work will occupy about 340 pages of printed matter.

The next duty was the classification of the Census of Deaths.

Then the number of Houses, distinguishing their materials, those vacant, and those in course of building and the number of families occupying them.

Then the Public Buildings and Places of Worship according to the Sects to which they belong.

And lastly the extracting from each sheet a list of every Shop, Store, Mill and Manufactory, with their return of capital, produce, rent, number of hands employed, &c., and the arranging of them in tabular forms.

2nd. The Agricultural Census.

The labour attendant upon this part of the Census has been immense, owing to the gross negligence of some of the Enumerators. In many cases the figures were almost illegible—in few cases were the castings correct, and in many there were none—and with few exceptions this part of the Census was taken in a more careless and imperfect manner than the Personal Census. The Agricultural Tables, when printed, will occupy about 204 pages; and it is believed that the whole of the tables will occupy between 600 and 700 pages of printed matter.

The present state of the work is as follows:—

Of the Personal Census.

1st. The *Origins* and *Religions* are printed.

2nd. The Census by *Ages, Births, Deaths, &c.*, of all the Counties of Upper Canada (with the exception of Wentworth and York, which are in an advanced state, and the Cities and Towns of Toronto, Hamilton, Kingston, Bytown, and London) are printed. In Lower Canada the greater part are entered into the tables and ready for the printer—and the whole are taken from the sheets, with the exception of the County of Terrebonne, and the City of Montreal.

3rd. *Trades and Occupations*.—In Lower Canada, the whole of them are extracted and ready for tabular arrangement. In Upper Canada, the majority of them are also extracted.

4th. *Causes of Death*.—The whole are taken in both Provinces.

5th. *The Number of Houses and Families occupying*.—The whole of these are extracted in Lower Canada, and the greater part in Upper Canada.

6th. *The Churches and Public Buildings* are also extracted in the Lower Province, and the greater part in the Upper Province.

7th. *The Grist and Saw Mills, and Manufactories*, are all extracted in both Provinces and ready for tabular arrangement.

8th. *The Agricultural Census*.—The whole of this in both Provinces is extracted; that of Upper Canada ready for the printer, and more than half of Lower Canada. Abstracts of this part of the Census have been furnished to the public.

It would be impossible to form any correct estimate of the time necessary for the completion of this work, but it is highly satisfactory to be able to state that, although the number of the Clerks in the Office has been greatly reduced, the classification of the Returns proceeds rapidly, and the printer is kept fully occupied. It may be well to remark here, that the duties of the Office have not been confined to the preparation of the Census, for a great amount of time and labour has been expended upon the Returns called for by the Legislature—in the compilation of the General Abstracts which have been published from time to time—and in furnishing information to the various Railway Companies in both Provinces—the demands of the latter, although in many cases calling for Statistical Tables extremely voluminous, and requiring considerable research and calculation, have been promptly attended to, although interfering materially with the ordinary work of the Office.

In the compilation of the United States Census, it has not been deemed necessary to divide the population into divisions other than by Counties, Cities, Wards or Boroughs. In our own, the population by Origins and Religions, already published, has been given by Townships. The Agricultural Census has also been prepared in the same way, but it becomes a question for serious consideration how far it may be advisable, in the completion of the work, to deviate from the original plan, and classify the various Tables by Counties alone. The subdivision of this matter may be interesting to the man of science, but can be of little general utility if published. The original Returns will be carefully preserved—the various Abstracts will at all times be accessible for reference in the Office—and, by adopting a more general classification of the matter, the expense of printing would be materially reduced.

Although so large a sum has been already devoted to this important undertaking, the expense will not contrast unfavourably with that of our neighbours, and it would appear that we have done more work, and at a less cost. From a Report recently published by Mr. Kennedy, the “Superintendent” of the United States Census, it appears that the regular staff of his Department consisted of 91 Clerks, 2 Messengers, 2 Watchmen, and 2 Labourers—that for a considerable period, this number was increased to 148, the whole of whom did extra work—and that the outlay *up to the 1st December, 1851*,—*although with a population not 13 times that of Canada*—has already amounted to

£317,000, or 16 times that of our own Census up to the present time, and all this exclusive of printing the Census when compiled; and includes that merely of a few Abstracts called for, from time to time, by Congress, and the Report above alluded to of about 150 pages. The Census Superintendent also states that there will still be required a sum of £37,500 *solely* to pay Clerks and Office expenses, before the completion of the work.

At no time has the number of Clerks in this Office exceeded eleven, and but for a short time did they perform extra work. At this time the number is reduced to four. The whole expense of the work *up to the present time* is about £20,000, of which £14,772 was paid to the Commissioners and Enumerators; £912 for postages up to the 8th Sept. last, and £872 for printing to the same date. The Office expenses have, as compared with those of other countries, been very moderate.

It will be seen from the above Report, that the cost of the United States Census, up to the 1st December, 1851, had been £1 10s. 7d. per 100 individuals, whilst that of Canada, up to the present time, has not reached £1 2s. 3d. per 100 individuals.

The experience of the Office shews that several alterations may be made in the various columns of the Schedules, which, whilst rendering the Returns more complete, will, at the same time, save much labour in their analyzation in the Office, and some of these changes are so important that it may be well to note them in this place.

Under the head of "Lands" there should be two additional columns, one for the land "under fallow" and one for the Agricultural Implements possessed by each landowner. The first is necessary in order to complete the subdivision of the total land "held" or "under cultivation," as without such a column the sum of the divisions cannot be equal to the whole.

The column for value of Implements would also afford a desirable source of information, not only as shewing the amount of that description of personal property, but as enabling the public in a future Census, to compare the progress in this most important criterion of industrial wealth.

That Farm Implements and Machinery form a very important item in the wealth of a country, it may be observed, that in the late Census of the United States, of which Abstracts are published, the columns for these two items shew the large amount of \$151,569,675 being 6s. 4d. currency per each acre of "improved" land. The extent under this denomination in the whole Union, (32 States and 4 Territories,) being, as per page 85 of the Census Superintendent's Report, 118,457,622 acres.

In Upper Canada the value of Implements would probably be more than equivalent to this amount, as there is no Farmer possessing 100 acres of cleared land, who has not more than 130 dollars worth of implements, waggons, ploughs, drags, threshing and winnowing machines, &c., &c.

Another very important item in the wealth of the Colony is the number of pleasure carriages and their value, for which there should be two columns, one for wheel carriages and another for pleasure sleighs, and a third column for their value.

That this is a very important item will be readily seen from the fact that these are luxuries procured from the surplus means of the owners, over and above the necessities of life, and also from the fact of their very great increase both in number and value. Take one County, with which I am acquainted. In 1833 there were only 3, not worth £50 altogether, and now there are upwards of 600, worth at least £10,000. This County contains a population of 32,000, and this item of wealth alone amounts to 6s. 3d. per individual.

The pleasure carriages were taken in the five Cities of Upper and Lower Canada, and in Bytown and London, but not elsewhere.

It is also a matter worthy of consideration whether there should not be a column for the value of the Church property in each Enumerator's divisions. To this branch of information our neighbours have paid a vast deal of attention, giving not only the value of all the Churches in the Union, but separately of twenty of the principal sects, having one column for all the minor sects together. To shew that this is a very important item in the aggregate wealth of the Country, it is only necessary to mention, that in Ohio, (the State which approximates the nearest to Canada in population,) the total value of Church property, (page 30 of the Superintendent's Report,) is \$5,765,149, and the population 1,980,427, being 14s. 9d. each individual. There is no reason to believe that the Church property in Canada is less valuable than that in Ohio.

There is another alteration in the heading of the columns, which is very important, and it may be well to notice them all here that they may not be lost sight of at the preparation of the sheets for the next decennial Census. In the large column headed "Information as to Mills, Factories, &c.," the headings should be subdivided into "Grist Mills," "Saw Mills," "Carding Mills," &c., &c., and there should be headings for "Value," "Capital employed," "Rental," "Number of Saws," "Number of run of Stones," &c., &c. The information given under the general heading is *undefined* and so incorrectly stated that little reliable information as to the wealth of the Colony in these respects can be gleaned from the Returns. Some Enumerators have given one characteristic of value and some another, and it is most important that whatever characteristic of value is given, it should be given wholly and truly for the entire Province. In many cases a sum of money has been set down for a mill, &c., and it was left to the mere surmise of the Clerk abstracting whether such sum was rent, outlay, or net profit.

Having thus alluded to the propriety of inserting six additional columns in the Census sheets, it may further be observed, that a slight change in the arrangement might be made with very good effect,—for instance, the columns for Married and Single, and Widows and Widowers, which are now on the second sheet of the Schedule, should in future be placed on the first—thus enabling the Clerk with greater facility to designate separately their respective Ages.

There should also be a double column for the Indians, as under the present arrangement their sex can only be ascertained by reference to the name—a very tedious process, and with Indian names a very doubtful one.

Another very necessary improvement would be to designate the particular weight of the Beef, Pork, and Fish. The Returns have been made in such a manner as to leave every thing to the judgment of the Clerk, whether they denote Barrels, Hundred weight or Pounds.

With these exceptions the Census sheets have been well arranged, and the information is capable of being easily and correctly extracted,—with these alterations and the increased intelligence of the people, both in giving and taking the Returns, a very great improvement may reasonably be expected in the amount of information derived from the next decennial Census.

The Returns of a Population Census acquire their chief utility from being contrasted with those of former periods, as from this comparison we learn the increase or decrease of the population, the annual rate of such variations, and the proportionate relation of the two sexes. From these results, as it has been said, “we approximate to something like a Law of Population, or to certain natural rules, the infraction of which must be due to particular and perhaps removeable disturbing causes.” It has been found that although the population of Great Britain has increased upwards of ten millions during the last half century, yet throughout this period the sexes have preserved their relative proportion, viz: 30 males to 31 females.

Until the Abstracts of the Personal Census are completed, it will be impossible to do justice to this most interesting feature of the Census. A few general remarks must at the present time suffice, and our chief attention be directed to the Agricultural produce and prospects of the Country.

It is believed that a very general feeling prevails, not only in the Mother Country, but even in Canada, that her growth and prosperity are not commensurate with that of the United States, and without any inclination to deny or conceal the rapid progress of our neighbours, it may be well, by a few facts, compiled from Statistical Returns, to prove how erroneous such an impression is,—the growth of Upper Canada, taking it from the year 1800, having been nearly *thrice* that of the United States.

According to the “World’s Progress,” a work published by “Putnam of New York,” in 1851, page 481—the free population of the United States was in 1800, 5,305,925; in 1850 it was 20,250,000, (in 1810 it was 7,239,814,) thus in 50 years its increase was not quite 400 per cent. whilst that of Upper Canada was upwards of 1100 per cent. for the 40 years, from 1811 to 1851.

Comparing the last decade of Upper-Canada with that of other Countries, exclusive of Australia and California; we arrive at the following result:

The total number of inhabitants in the United States, on the 1st of June, 1850, according to the Census Report, was 23,263,488, but it has been shewn that the probable amount of population acquired by Territorial additions should be deducted in making a comparison between the last and former Census. These diminish the total population of the Country as a basis of comparison to 23,091,488.

United States—Census of 1850.....23,091,488

“ 1840,.....17,067,453

Increase in 10 years,..... 6,022,035 or 35,27 per cent

Great Britain—Census of 1851,.....21,121,967

“ 1841,.....18,658,372

Increase in 10 years,..... .. 2,463,595 or 13,20 per cent.

Ireland—Census of 1841, 8,175,124

“ 1851,.. 6,515,794

Decrease in 10 years,..... 1,659,330 or 20 per cent.

Upper Canada—Census of 1851,..... 952,004

“ 1841,..... 465,357

Increase in 10 years,..... 486,647 or 104,58 per cent.

The first Census of Great Britain was taken in 1801, at which date the population amounted to 10,567,893, and thus it has doubled itself in half a century, an increase nearly equalling that in all preceding ages. It is supposed that in the eleven centuries which elapsed between the landing of Julius Cæsar and William the Conqueror, the population hardly doubled itself, thus, that which in former times it required eleven centuries to accomplish in England, has been done in Upper Canada in 10 years. The Census Returns of all Countries prove how much faster population increases in modern than in ancient times. In the last 10 years, 5,308,181 have been added to the population of Great Britain, which exceeds the known increase of the last 50 years of the last century.

Whilst the population of almost all other Countries is increasing, that of Ireland is, from various causes, 286,033 less than it was in 1851; the greatest decrease has been in the County of Cork, where, in 10 years, the population has been reduced from 773,398 to 551,152.

It may be argued that it is not fair to take the whole of the United States for a comparison with Upper Canada, much of that Country being comparatively old and long settled. It will be seen from the United States Census, that the three States of Ohio, Michigan and Illinois, contained in 1830, 1,126,851. In 1850 they contained 3,505,000, a little over 320 per cent. in 20 years.

Canada West contained in 1830, 210,437 ; in 1849, it contained 791,000, which is over 375 per cent. for the same period of 20 years—so that the increase in these three choice States was 55 per cent. less than that of Canada West during the same time. The Western States attract an enormous population, and at this time settlers are crowding into Iowa, and peopling the banks of the Missouri.

The Statistics of Canada prove the same feeling to exist here as in the United States. The Gore and Wellington Districts have increased 1900 per cent. in 33 years up to 1850. The Western District has increased over 700 per cent.; the London District, 550 per cent.; the County of Norfolk, 550 per cent.; the County of Niagara about 380 per cent.; while, in eight years, the County of Oxford has doubled its population.

And in the far West of Canada, the Counties of Huron, Perth and Bruce, have increased from 5,600 in 1841, to 37,580 in 1851, being upwards of 571 per cent. in 10 years, an increase almost beyond comprehension. It appears from Smith's work on Canada, that the Huron District has made more rapid progress since its first settlement in 1827, than the States of Ohio, Michigan and Illinois did in double that time, or than Lower Canada did in 104 years; the latter is doubtless owing to the almost entire absorption by Western Canada of the vast Immigration from Europe.

This immense increase is not however confined to the rural Districts, for the Cities and Towns will equally vie with those of the United States, and a few extracts from the Rev. Mr. Lillie's excellent Lectures on the growth and prospects of Canada, afford an interesting proof of this fact.

The population of Boston, was in 1790,.....	18,038
1810,.....	33,250
1820,.....	43,298
1830,.....	61,391
1840,	93,000
1850,.....	135,000

“ Dividing the above into two periods of 30 years each. Boston contained at the close of the first about $2\frac{1}{2}$ times its number inhabitants at the commencement, while the close of the second shews times the number of the beginning, the population of 1850 is eight times (or nearly) that of 1790. Toronto being in the former of these years over six times what it was 18 years before (in 1832), and more than 75 times what it was 49 years before (in 1801.) Between 1840 and 1850, the increase was on Boston 45 per cent. ; on Toronto 95 per cent.”

“ New York, the emporium of the New World and a City which for its age may vie with any in the world, numbered

In 1790.....	33,131
1810.....	96,373
1830.....	202,548
1840.....	312,710
1850.....	517,000

“ Its increase thus stands as compared with Toronto— $2\frac{1}{2}$ times in the 20 years from 1830 to 1850, against 6 times in the 18 years between 1832 and 1850,—16 times in 60 years against 75 times in 49 years—66 per cent. between 1840 and 1850, against 95 per cent.

“ St. Louis which had in 1850, 70,000 inhabitants had increased it 15 times that in 1820. Toronto had in 1850 increased hers 18 times that in 1817.”

“ The population in Cincinnati was in 1850, 115,590 or 12 times its amount in 1820, 30 years before, and Toronto had in 1850, 18 times its population in 1817 or 33 years before.”

Hamilton had in 1836 a population of 2,846 and now by the last Census 14,112.

Dundas has in 6 years increased from 1,700 to 3,517.

The increase in Brantford during the last 10 years has been nearly 300 per cent., and during the year 1850–51, rose from 3,200 to 4,000, or 25 per cent. Belleville in the same period has increased from 3,500 to 4,569. London from 5,124 to 7,035.

Galt has increased in 5 years from 1,000 to 2,248, and Guelph in seven years, from 700 to 1,860.

Woodstock has increased in 1850–51, from 1,200 to 2,112, and Ingersoll has increased in 4 years, from 500 to 1,190.

Kingston, in 10 years, from 6,292 to 11,585.

Toronto, “ “ 14,249 to 30,775.

Lower Canada though not advancing in the same ratio presents some few instances of an enormous increase in her population. Among these we may instance

The County of Megantic, which in seven years, from 1844 to 1851 increased from 6,449 to 13,835, or at the rate of 115.40 per cent.

The County of Ottawa, which in the same time has increased from 12,434 to 22,903, or 84.42 per cent.

The County of Drummond from 9,354 to 16,562, or 77.28 per cent, and
The County of Sherbrooke from 13,485 to 20,014, or 49.47 per cent.

The following Table which may be interesting for the purpose of reference, is compiled from Weber's Almanack for 1853, published at Leipsic, and gives the population of the largest Cities in Europe and North America. As the Germans are proverbially accurate in their Statistical statements, it is believed that it may be relied upon as correct.

1. London.....	2,363,141	34. Pesth	125,000
2. Paris	1,053,262	35. Prague	124,181
3. Constantinople	786,990	36. Barcelona	120,000
4. New-York	522,766	37. Genoa	120,000
5. St. Petersburg	478,437	38. Cincinnati	116,710
6. Vienna	477,846	39. New Orleans.....	116,348
7. Berlin	441,931	40. Bristol	115,000
8. Naples	416,475	41. Ghent.....	112,410
9. Philadelphia.....	409,354	42. Munich..	106,770
10. Liverpool	384,263	43. Breslau.....	104,000

The following is the rate of increase in the population of Upper Canada from the year 1811.

In 1811 the population was 77,000 according to Bouchette.

1824	ditto	151,097	rate of increase.	7.40	p. ct. p. a.
1825	ditto	158,027	ditto	4.59	ditto
1826	ditto	163,703	ditto	3.60	ditto
1827	ditto	176,059	ditto	7.54	ditto
1828	ditto	185,526	ditto	5.37	ditto
1832	ditto	261,060	ditto	10.18	ditto
1834	ditto	320,693	ditto	11.42	ditto
1835	ditto	336,469	ditto	4.91	ditto
1838	ditto	385,824	ditto	4.88	ditto
1839	ditto	407,515	ditto	5.62	ditto

In 1840 the population was 427,441 rate of increase. 4.88 p. ct. p. a.

1841	ditto	465,357	ditto	8.87	ditto
1842	ditto	486,055	ditto	4.45	ditto
1848	ditto	723,332	ditto	7. 7	ditto
1851	ditto	952,004	ditto	10.54	ditto

The Electoral Divisions of Upper Canada, with their population, is given by the Census of 1848 as in the subjoined Table.

The very incomplete state of the Personal Census induces a reluctance to offer more at the present time, than the few general observations and tables above ; from the Agricultural Returns more satisfactory deductions may be drawn, and the complete state of that portion of the Census enables me to present a series of tables, which may not be wholly devoid of interest or value.

Whilst displaying our own progress, I have thought it advisable to contrast it with that of our enterprising neighbors, and it will be seen that I have chosen the State of Ohio, as presenting, in every respect, the fairest comparison with Canada,—and perhaps the most favorable one, for them, amongst her sister States. She is in fact the best State in the Union in proportion to her population ; and to shew this point clearly I have given the averages of the whole Union, that it may be seen at a glance how very large a portion of the whole produce of the States is grown in that one State. Another reason was, because the population and total *occupied* lands are very nearly the same in Ohio as in Canada,—even if it be thought that Canada suffers by the comparison, it will not prevent our deriving benefit from the experience that Ohio's prosperity affords us, but though in some points she far surpasses this Colony, yet taking *all* the facts into consideration, Canada may hold up her head proudly. Her ratio of increase and progress, for the last ten years, has been much greater than that of the neighboring State, and for the coming ten years the ratio of her increase will be accelerated far beyond her neighbors.

The occupied lands *uncultivated* are as ten and a-half millions to Ohio's eight millions. Canada's lands *unoccupied* are one hundred and thirty-seven millions to her seven and a-half millions ; in the Upper Province alone there are nearly eleven millions of acres unoccupied.

Considering that her ratio of increase of population during the last ten years was only $33\frac{1}{2}$ per cent., and that of Upper Canada $104\frac{1}{2}$ per cent., may we not reasonably expect to leave her far in the shade at the next decennial Census. Even now, in wealth and prosperity, we are at least on equal footing as regards the acreable produce of our cultivated lands, but not equal to her individual wealth, and for a very good reason—Ohio has one-fourth more cleared land per individual than Canada has, having five acres to Canada's four, and the population nearly equal.

COMPARATIVE TABLE of the Agricultural Produce, &c., of Canada and the United States.

14	Simcoe.....	16	9	17	2	15	7

The County of Prince Edward has the largest crop of Indian Corn, viz: 30 bushels 49 lbs. per acre owing probably to its situation between two large bodies of water, which ward off the early and late frosts.

The produce of Wheat in the County of Peterboro is the nearest the average of all Upper Canada, which is 16 bushels 14 lbs. per acre.

The Townships giving the largest returns of Wheat are:—

		16,202,272
Total growth of Wheat in all Canada, calculating the Flour at 5 Bushels per Barrel—the consumption at 5 Bushels per head—and the Seed at $1\frac{1}{2}$ Bushels per acre,		15,162,662
		1,039,610

Leaving 1,039,610 Bushels to be accounted for in some other way.

The Home consumption is probably very nearly five and a-half Bushels for each individual; the seed required in 1853 would be for the increased number of acres under Wheat in 1854.

In the United States the Home consumption is calculated at six bushels per head,—but there appears to be no ground for such a calculation, especially as so much Indian Corn is used for food—and in fact the whole growth of Wheat in 1850, as given on page fifty-seven of the Abstract of the last Census of the United States, divided into the population of the same year, gives only $4\frac{1}{6}$ bushels for each inhabitant, whilst the Returns of the Canada Census give more than double that amount, viz: $8\frac{1}{6}$ bushels.

It is true that the quantity of Indian Corn per individual is much larger in the United States than in Canada, but it is well worth observing, that, deducting the Exports of that year, amounting to about $12\frac{1}{2}$ millions of bushels, (allowing five bushels to the barrel of Flour,) as appears in page fifty-seven of the Abstract of their last Census,—and allowing $12\frac{1}{2}$ millions for seed at $1\frac{1}{2}$ bushels per acre, their individual consumption of Wheat is little more than three bushels per head—whilst that of Canada is $5\frac{1}{2}$ —this may be accounted for by the increased consumption of Rice as well as Indian Corn.

In the United States the growth of Wheat has increased about forty-eight per cent. during the last ten years, whilst in all Canada, during the same period, it has increased upwards of 400 per cent. !! And taking the article of Indian Corn, which is the production that compares most favourably for the United States, the increase on it for the ten years between 1840 and 1850, has been equal to 56 per cent. viz: from $377\frac{1}{2}$ millions of bushels to $592\frac{1}{3}$ millions,—(see page 60 of Mr. Kennedy's Report,)—whilst the increase in Canada for the last nine years has been 163 per cent. the Census having been taken in 1842 and not in 1841. During the same period also, the increase in the growth of Oats in the United States has been 17 per cent., whilst in Upper Canada it has been 133 per cent.,—in Lower Canada, 41 per cent.,—and in both united 70 per cent.

In Peas we find the increase in Upper Canada has been 140 per cent., in nine years—that of the United States, or any of them, is not given in the Abstract of the Census; but, with them, it appears to be an article of little importance, the whole crop of all the States and Territories being only a few bushels over the produce of Canada.

In comparing the different columns of the foregoing tables, some not uninteresting inferences and deductions may be drawn.

It will be perceived that though the number of cultivated acres in Ohio is one-fourth greater than those of Canada, being 9,800,000 to 7,300,000, or rather more than ten to seven, yet the bushels of Wheat are one-twelfth less, being in Ohio 14,487,000 to 16,202,272.

Ohio, in cultivated acres, possesses $\frac{1}{12}$ of all the United States. In uncultivated acres, possesses $\frac{1}{22}$ of the same.

She possesses one-fourth more cultivated land per inhabitant than Canada, having five acres to four.

All Canada produces one-seventh more bushels of Wheat than Ohio, and $1\frac{1}{2}$ bushels more per individual. Upper Canada, however, produces six bushels more Wheat per individual than Ohio—the latter producing in her staple Indian Corn twenty-nine times more than Canada, which produces 77 times more Peas, and 54 per cent. more Oats than Ohio. The land of Ohio is valued at nearly double that of the average of the Union,—(see the Report of Mr. Kennedy, page 49,)—and has more than three times as many inhabitants to the square mile as the Average of the Union—she having $49\frac{55}{100}$ and the average of the States being $15\frac{75}{100}$.

The produce of Wheat per acre in Upper Canada is $16\frac{14}{60}$ and in Lower Canada $7\frac{8}{60}$ bushels per acre. The Census Superintendent in the States has followed in the footsteps of the English Superintendent in not giving an account of the number of acres under any particular description of crop, and thus we can form no just opinion of acreable produce. This is much to be regretted as the more we particularize comparisons, not only of County with County, or State with State, but Townships with Townships, Fields with Fields, and Acres with Acres, the more easy shall we find it to draw useful deductions to account for success here, or failure there, and to ascertain whether it be

climate or soil, or management, or skill, or the absence of them, or defect in them, that gives one locality an advantage over another.

To give an example of this, it is only necessary to see the vast difference which exists in the amount and value of different productions in different parts of the same Country.

In the article of Wheat, we find that the whole United States produced in 1850,* only 100,479,000 bushels, whilst the one state of Ohio—one out of 32 and 4 large Territories—produced more than $\frac{1}{7}$ th of the whole Union.

Again Ohio produced $7\frac{1}{2}$ bushels for each inhabitant, whilst the whole of the United States produced only $4\frac{1}{3}$ —the former having one-eighth of her cultivated land under Wheat, whilst the whole Union has not one-twentieth of the cultivated land under that crop.

With perhaps equal advantages we find an enormous discrepancy in some of our own Wheat-growing Districts. In the year 1850, the Township of Esquesing, in the County of Halton, produced 26 bushels of Wheat to the acre, and that of Adolphustown, in the County of Lennox, only 6 bushels to the acre, and this with soil and climate perhaps equally good. This is at once accounted for by the ravages of that fearful plague to the farmer—the Weevil. The worst Wheat crops in Canada West, in the year 1851, were in those Counties where the Weevil was prevalent. It committed the most serious depredations, in very many cases having rendered whole fields of most promising Wheat not worth the threshing. This fly, which deposits its larvæ in the blossom of the Wheat in order to feed upon the milk of the grain as it ripens, was, unfortunately in that year most abundant in the Counties of Frontenac, Lennox, Addington, Hastings, and Prince Edward, and is travelling gradually West at the rate of about nine miles every summer, and remains from 5 to 7 years in a locality. The only prevention yet discovered has been to sow early seed on early land, and very early in the autumn, so that the Wheat may blossom before its enemy takes wing, the period for which depends much upon the earliness of the season. So destructive was the fly in 1851, that the fine Agricultural County of Lennox produced only 6 bushels per acre, Hastings about 10, and Prince Edward, Addington and Frontenac, about 11. It had not in that year reached the County of Northumberland, but was very destructive in that County the following year, 1852.

Canada possessed, in 1851, 46,939 more Milch Cows than Ohio, and yet Ohio produces $\frac{1}{3}$ more Butter, and nearly eight times as much Cheese as Canada.

This is a most important feature in the difference between the two Countries—amounting annually to the large sum of £276,122 for Butter, and £376,703 for Cheese, in favor of Ohio, although Canada possesses nearly 47,000 more Cows. How to account for so great a difference, the prices being taken at the same rate in both Countries, is a very difficult matter. The having a more congenial climate than Canada East, shorter winter, and the supply of green food continuing for a larger period, may account for a great deal, but certainly not for such a serious discrepancy. The natural inference is that the breed of Cows in Canada must be very inferior to those of Ohio.

It may, however, fairly be observed that Ohio exceeds the average of the whole United States, in the amount of Butter per Cow, 27 per cent., and in the amount of Cheese, 133 per cent.; Upper Canada exceeds the average of the whole Union by about 9 per cent. in Butter, but is very deficient in Cheese. The difference in the value of the yield of one Cow in Upper Canada and Ohio, calculating the price of Butter at $7\frac{1}{2}$ d per lb., and the Cheese at 5d., in both places, would be 16s. $10\frac{1}{2}$ d. in favor of Ohio, and the extra milk and whey would make 20s., supposing the returns to be correct, which there is no good reason for doubting. As a proof, however, if proof were necessary, that the climate of Ohio is much less severe than that of Canada, it may be stated that although she has $\frac{1}{3}$ more Horses, viz: 78,020—about 63,000 more young Cattle, and $2\frac{1}{2}$ millions more Sheep, she produces less Hay by 204,293 tons, and very much less Straw and other Fodder, even allowing that she has 29 times more Corn Stalks.

The increase in the production of the articles of Butter and Cheese in Canada, has notwithstanding been enormous, and we find that within the three years, 1849, 1850 and 1851, the amount of Butter produced has, in the Upper Province, increased 372 per cent., and that of Cheese during the same period, 233 per cent., which leads to the inference, that our Milch Cows are rapidly improving in quality. The Census Returns of the Lower Province, previous to the year 1851, are very deficient as to the amount of these articles.

The next most important feature in the difference between Ohio and Canada, is the number of their Sheep, and the consequent value of their wool. Here too the amazing difference is difficult to be accounted for, but the fact should open the eyes of the Canadian Farmers to their interest.

The number of Sheep in Canada, in round numbers, is 1,600,000, in Ohio 4,000,000, although the number of acres *occupied* is very nearly the same, and the number of acres *cultivated* only about one-third greater than in our Provinces. In the value of Wool alone the annual difference in favor of the former is..... £606,564

And in Sheep at 7s. 6d. each, it is..... 879,405

£1,485,969

the latter item, being capital, which, deducting the expense of keep, &c., pays at least 33 per cent. per annum, net profit, and allowing for increase in numbers every year, might fairly be calculated at fifty per cent.

It must, however, be observed that notwithstanding the striking superiority of Ohio in this particular, the rate of increase in the number of Sheep, as compared with that in the United States would appear, from page 67 of Mr. Kennedy's Report, to be greatly in favor of Canada, for in ten years the increase in the States has been only 10 per cent., and in the weight of the fleece only 32 per cent., whereas in Canada the increase in wool has, in nine years, been 64 per cent., and that of Sheep, 35 per cent., shewing an improvement in the weight of the fleece of not far off 30 per cent.

The average weight in Canada is found to be :

In Upper Canada	$2\frac{14}{16}$ lbs.
In Lower Canada.....	$2\frac{4}{16}$ “
In all Canada	$2\frac{10}{16}$ “

whilst in the United States it is, as per page 67 of the Abstract, $2\frac{7}{16}$ or $2\frac{43}{100}$ lbs., shewing an excess in favor of Canada in the average of nearly 3 oz. per fleece. The proportion too in both Countries i. e., the whole United States and Canada, is about the same, being about 9 Sheep to every 10 inhabitants. Upper Canada has about ten sheep to every 100 acres occupied; Lower Canada has 8, and the United States has $7\frac{17}{100}$.

With regard to Horses there are in both Canadas, according to the Census Returns 385,377, or very nearly one to every five inhabitants, and they have increased during the last nine years 48 per cent. In some Counties the increase has been very much greater than this, for we find in Oxford an increase of 350 per cent., and in some Townships in that County even 400 per cent.; this would induce a belief that there was some great error in the Returns of 1842, and there seems to be no good reason why the number of Horses should not have kept pace with the population; the wealth of the latter having, also, during that time so materially increased. If in 9 or 10 years, the population has increased cent. per cent.; it is almost unaccountable that the number of Horses should not have increased in a similar ratio.

It is stated by the Census Superintendent, that in the United States, where Railways have been extensively constructed, the number of Horses has been very much decreased, and according to the Abstract accompanying his last Report, the number in New York has decreased by 26,566; in Pensylvania by 13,000; in New England by 77,000, or more than 25 per cent., “while in all the States (he remarks) Railroad conveyance “has almost superseded the use of horses for travelling purposes along main routes.” He adds, “we would more readily attribute the apparent diminution to the omission to “enumerate the horses in cities and towns than to any superseding of horse power.”

There can be no doubt that this must be the reason for any apparent decrease, for the experience of other countries shews a very different effect, as produced by Railway travelling.

In Great Britain, the number of horses employed at the Great Railway Termini, and the numerous intermediate stations, very far exceeds the number formerly employed in the Stage and Posting Departments. The facilities afforded by Railway communication, and the saving of time, combined with so much greater comfort, has led to an enormous increase of travellers, and the tens who formerly travelled between the chief Cities and Towns of a Country, either on business or for pleasure, are now multiplied to hundreds. The main routes may be comparatively deserted, but it is difficult to believe that the construction of Railways, which must be fed at every point with their freights, living as well as dead, can have any other effect than an increase in the employment of Horses.

The horses and mules of the whole Union, constitute a proportion of 1 to 5 of the inhabitants. New York has only 1 to 7; Pennsylvania 1 to $6\frac{6}{10}$; and Ohio has 1 to $4\frac{3}{10}$. In the new States of the West, the increase in horses has kept pace with that of the population, and so also in Canada West the new Townships shew a far greater increase than the older ones.

From this kind of comparison it will be seen that there are various branches of Agriculture well deserving of the increased attention of the Canadian farmer.

Ohio far exceeds Canada in Indian Corn, Butter and Cheese, Grass Seed, Wool, Tobacco, and Beef and Pork.

Canada far exceeds Ohio in Wheat, Peas, Rye, Barley, Oats, Buckwheat, Hay, Hemp and Flax, Hops, Maple Sugar and Potatoes; and also, considering that Ohio has one-third more cultivated land, in total value of live stock. This bears a proportion of only $12\frac{3}{4}$ to 11, whilst the cultivated land of Ohio to that of Canada is as 10 to $7\frac{1}{2}$.

In all the above enumerated articles, viz: live stock, grain, other farm produce, articles manufactured from Flax, Hemp and Wool, Beef and Pork, Ohio exceeds Canada by £8,199,310, being very little over $\frac{1}{3}$ more than the produce of Canada, and if the produce of the *Forest* be calculated, of which Canada exported in 1851, value for upwards of one million and a half of pounds, the relative wealth per acre would be in favor of Canada.

The ratio of increase of population in Ohio for 10 years, from 1840 to 1850, is $33\frac{33}{100}$ per cent.—that of Upper Canada, in the same period, has been $104\frac{58}{100}$ per cent.—that of Lower Canada for 7 years, from 1844 to 1851, has been 20 per cent.

When it is considered that there are 31 States, 1 District and 4 Territories; and that Ohio has 8 per cent. of the whole population of the Union,— $8\frac{3}{4}$ per cent. of the Grain of the whole Union except Rice,—and about $10\frac{1}{2}$ per cent. of all other Agricultural produce not manufactured, and 7 per cent. of Butter, Cheese, Beef, Pork and Domestic Manufactures of the whole Union, and that Canada equals Ohio in *acreable* produce, is there not good reason for expecting that Canada, with her more extended scope, and her more rapidly increasing population, will, in a very few years, make a much nearer approximation to the produce of the whole Union than Ohio does now.

As a *Summary* of the inferences which may be drawn from this comparison between Ohio and the United States and Canada, and they are both numerous and important, the following brief remarks embrace those perhaps most worthy of notice:

1st. Canada should attend to the improvement of the breed of Milch Cows; the value of Butter and Cheese produced in Ohio from 47,000 fewer Cows, and calculated at the same price in both places, being about 70 per cent. more than in Canada.

2nd. Canada should make more Cheese. Ohio produces 760 per cent. more than Canada, and 28 per cent. more Butter. Canada depends too much on Foreign Countries

for her supply of Cheese, and the demand for American Cheese in Canada causes its production in such large quantities in Ohio. At present Cheese is much the more profitable of the dairy produce. The value of Cheese in Ohio, at 5d. per lb., is £433,740, against £57,037, the value of Cheese in Canada at the same price—making a difference in favor of Ohio of £376,703.

3rd. Canada should grow more Clover Seed and Grass Seed for which her climate is quite as well adapted as Ohio. Of these two articles, the latter grows 130 per cent. more than Canada, making a difference of £80,000 against Canada, always bearing in mind that the cultivated land of Ohio is 33 per cent. more than that of Canada. The farmer should not be under the necessity of purchasing clover seed—the very purchase makes him sparing, and a field of wheat or barley should not be sown without seeding it down with 10 or 12 lbs. of red clover per acre. It is a fact equally consistent with practical experience and theoretical science that, other things being equal, the acreable produce of wheat, barley and oats will be in proportion to the amount of clover grown and ploughed under, or consumed by stock on the farm. With regard to the other suggested improvements there may be some arguments against them on the score of climate, but in this no such can apply, for the climate of Canada is quite as good for the production of clover and grass seeds as that of Ohio. Frosts do not injure the seed and it may therefore be allowed to remain in the field late in the fall. A more extended growth of these articles would ensure an increased extent and richness of pasture and would add to the quantities of butter and cheese.

4th. Canada should keep more Sheep—the value of sheep and wool being both 140 per cent. higher in Ohio than in Canada, though the quality of sheep and weight of fleece is rather better in the latter, and the cultivated land of Ohio only 33½ per cent. more than in Canada.

In value of Sheep, Ohio exceeds Canada.....	£879,405
“ Wool,	606,564
	£1,585,969

5th. Canada should grow more Indian Corn. Ohio produces 2800 per cent. more than Canada, although the difference in the climate in the Upper Province does not warrant anything like so great a difference. The average acreable value is not quite so great as that of Wheat—the average crop of Wheat, 16 bushels at 4s. is £3 4s. and 24 bushels of Indian Corn at 2s 6d. is £3; but it should be remembered that Wheat occupies the land two years and Indian Corn one, and requires more outlay for seed and labour than Indian Corn; and an acre of corn stalks is more valuable than an acre of straw, and the condition of the land after corn is much better than after wheat.

Taking all these matters into consideration, one acre of Indian Corn is as profitable as two acres of wheat where the climate is suitable for the growth of both.

6th. Canada should have fewer acres under wheat as well as more under Corn. There is too large a proportion of the land in Upper Canada under Wheat, nearly one-fifth of the whole cultivated land, say $\frac{4}{19}$.

In Ohio there is said to be only one-eighth of the cultivated land under wheat, but that is much to be doubted, as taking it at that, it gives only twelve bushels average per acre. It is very probable that there is not more than $\frac{1}{10}$ under wheat; this would leave the average fifteen bushels per acre—the acres under different crops are not given in the United States Census. The Wheat crop of Canada is nearly $\frac{1}{6}$, say $\frac{4}{5}$ of that of the whole United States and Territories. It is very doubtful whether she can maintain this proportion for many years without diminishing her acreable produce, unless the new clearances be very extensive.

7th. Canada might grow more Tobacco. Ohio produces 850 per cent. more than Canada,—and a large portion of Upper Canada is well calculated for its growth. In this article alone Ohio has £230,000 worth more than Canada.

Already the population of Canada is more than $\frac{1}{13}$ of the Union—the area in square miles, exclusive of the Territories, is one-sixth, and of course in acres the same—in occupied acres about $\frac{1}{17}$ —in growth of Wheat very nearly one-sixth of the whole Union—in Barley more than one-fourth; in Oats one-seventh; in Buck Wheat one-eighth; in all grain including Indian Corn about $\frac{1}{9}$,—exclusive of Indian Corn, about one-sixth,—of Rice, Canada has none, neither has Ohio,—the whole Union produces 215,312,710 lbs., which at three pence per pound would be £2,691,408 in favour of the Union.

Even at present Canada compares most favorably in proportion to her population with the States, and when the Railroads now in course of formation shall have united the whole British possessions in North America, the increased facilities and aroused and invigorated energies, and improving climate and more rapidly increasing population, and interminable water communication, and extensive fisheries, will, in a few years, enable the British North American possessions to make no unfavourable comparison with the Union, flourish as she may.

The whole area of the United States and territories is 3,230,572 square miles which multiplied by 640 gives the number of acres 2,057,566,080, certainly a prodigious Territory, but the British possessions in North America far exceed this.

The exact amount according to Allison is 4,109,630 square geographical miles, and the water in British America is 1,340,000 square miles,—the whole Terrestrial Globe embraces about 37,000,000 square miles, so that British America contains nearly a ninth part of the whole terrestrial surface of the Globe—the number of acres is 2,630,163,200. Allison remarks that a very large portion is perhaps doomed to everlasting sterility, owing to the severity of the climate—such is no doubt the case, but it should be recollected that as the Country becomes cleared up, the climate improves, and that there are at present twenty or thirty millions of acres, to the successful cultivation of which the climate presents no insuperable barrier.

Two or three centuries ago, the Rhine used to be frozen, and the animals, the natives of the Northern Regions, were abundant on its banks,—how different is the case now. It will be so in British North America, with this difference, that the improving

climate will keep pace with the vastly accelerated movements, and more rapidly increasing numbers of the New World Settlers.

The means that are taken by Government to promote Immigration, and improve the Agriculture of the Country, will stimulate progression to an indefinite degree.—The formation of a Bureau of Agriculture is an important feature in the history of Canada, and the most important results may be expected from its labours. In industry and perseverance, the Canadian Farmer stands perhaps unrivalled, and it rests with those who have the power to assist him by the diffusion of that kind of knowledge, which, unaided, he has no means of acquiring. The time has happily passed when a perseverance in old habits and prejudices was thought to be a virtue—let the results of science and the experience of our own and other Countries, be placed within the reach of our industrial population, and a blessing will result to the individual and the Country, with a certainty and speed unattainable without this aid.

The importance of furnishing valuable and scientific information, in a simple and practical form, to a class of men, who are, in many cases, naturally unable to wade through the technicalities of science, has been greatly felt—to men too, who, often isolated from society, are perhaps unable to avail themselves of such literature as may issue from other sources on this subject. A similar Bureau has been for some time in existence in the States, and France and Prussia have lately followed their example.

In nothing has their importance proved to be so great as in that difficult and laborious one of compilation and condensation. By their means, the accumulated experience, not only of their own but of other Countries, their improvements, and their inventions, have been placed at the disposal of the poorest farmer; and it has been found that the issue of Pamphlets, emanating from a Government Department, possessing as it does so much greater facilities for the collection and distribution of knowledge, has been of incalculable value to the community, as enabling them to compare the experience of so wide a field with that of their own limited sphere of action. Deductions and inferences compiled from large masses of information by talented and practical men, and divested as much as possible of technicalities or theoretical suggestions and speculations have already created a vital change in the operations of the industrious and hard-working farmer.

Statistics truthfully compiled cannot fail to be interesting to almost all parties. The term "Statistics" originated with the late Sir John Sinclair, who in the 20th vol. of his Statistical account of Scotland, thus remarks: "Many people were at first surprised at my using the new words Statistics and Statistical. The idea I annex to the term, is an enquiry into the state of a Country, for the purpose of ascertaining the quantum of happiness enjoyed by its inhabitants, and the means of its future improvement. A Statistical account of a Country should contain not only the names of each County, Township, &c., but the nature of the soil and surface, the extent and description of the Lakes, Bays, Rivers, Islands, Woods, &c., the nature of the Climate, Diseases, state of Longevity, Vegetable productions, Mines and Minerals, and Manners and Customs of the People, and Imports and Exports, &c."

“No science,” (says Sir John,) “can furnish to any mind capable of receiving useful information, so much real entertainment, none can yield such important hints for the improvement of Agriculture—for the extension of Commercial industry—for regulating the conduct of individuals, or for extending the prosperity of the State—none can tend so much to promote the general happiness of the species.”

There is no limit to the useful inferences and deductions that can be drawn from these Statistics, now laid or about to be laid before the public. In addition to those here given, each man can arrive at results from the examination of the particular branch of any subject or subjects for which the formation of his mind may have a peculiar bias. Population, Families, Creeds, Ages, Occupations, Wealth, Industry, Products of all kinds, Diseases, Deafness, Blindness, Lunacy, Death and its causes; all these in their varied phases and their varied influences upon society and self, open a wide field for scientific enquiry and valuable inferences to conduce to the increased knowledge and amelioration of mankind—the subjects for thought and enquiry furnished by copious Statistics of a Country are utterly inexhaustible.

At the present time it may be advisable to confine our notice of the Census to the foregoing remarks. Its completion may open a field for further enquiry.

Respectfully submitting the above,

I have the honor to remain,

Gentlemen,

Your obedient humble servant,

WILLIAM HUTTON,
Secretary.

Since writing the above, I have been induced to make the following :—

REMARKS ON THE CENSUS OF GREAT BRITAIN, &c.

Having applied to the Registrar General of Great Britain for a copy of the last Census of that Country, the part already published was most promptly furnished and reached this Office by the last mail. A very cursory glance at this admirable work has suggested a few observations which may not be out of place. The most striking difference in the plan of taking the Census of Great Britain and that of Canada is in the number of enumerators employed. To take a population of 16,921,888, which is that of England, independent of Wales and Scotland, there were employed 27,884 enumerators. This allows about 607 individuals to each enumerator, for which he was paid 23s. sterling, subject to a deduction of five shillings if his Schedule was not returned to the Registrar before the 8th of April, eight days after the Census was taken. For 300 inhabitants the enumerator was paid eighteen shillings and an additional fee of one shilling for every sixty persons above 300 daily enumerated. [Of course the fees would be a very inadequate remuneration in Canada where labour is so much more valuable.]

The great advantages of having a number of enumerators, with so little duty, are very apparent.

Each enumerator would have a knowledge of his own locality, would be likely to make no *great* mistakes, and would readily from his own personal knowledge detect any attempt on the part of his neighbours to give in false returns,—the work could be much more promptly done and certainly much more correctly.

The columns of figures would not be so numerous and the Abstracts would on that account be much more easily and correctly taken.

In many instances, School Teachers were the persons employed as enumerators, and their *character* was at stake in the correctness of the additions and abstracts—the writing and figures were clear and distinct, and the general result most satisfactory.

There were Superintendant Registrars appointed who received £5 for revising the Enumerators' Schedules and preparing an abstract of the totals. The persons were paid a further sum of one shilling for every 1000 persons, if all the Schedules were sent into the Census Office before the 30th April.

There were also Registrars appointed who received £3 for the preparation of the various returns and the verification of the Schedule, and this officer received ten pence per 100 additional, if the Schedules of his district were sent in to the Superintendent Registrar before the 22nd day of April.—This system of reward for expedition and exactness was found to answer an excellent purpose and would be worthy of attention when about to take the next decennial Census in Canada.

The population of Great Britain stood thus on the 31st March, 1851:—

England.....	16,921,888	} 21,121,967.
Wales... ..	1,005,721	
Scotland	2,888,742	
Islands in British Seas.....	143,126	
Persons at Sea or abroad.....	162,490	

In Great Britain the families are considerably smaller than in Canada, owing no doubt to the youthfulness of our Colony and the constant accession of young people to our shores, leaving the elder branches at home. In Great Britain each family consists of $4\frac{73}{100}$ and each house contains $5\frac{7}{100}$. In Canada the families and houses average $6\frac{1}{4}$ to each. In Great Britain, 12 per cent. or 1 in 8 or 9 of these families keep servants. In Canada, probably not more than 1 in 20—but this part of the Census not being completed it cannot be ascertained at present, nor hereafter with any accuracy, as the enumerators have classed the servants in many cases under the head of labourers. In great Britain there are 2 acres to each person, and 11 acres to each inhabited house. In Canada there are nearly $9\frac{1}{2}$ acres to each person and 58 acres to each house.

In Great Britain the mean distance between each house is 252 yards, and between each person 108 yards.

In London the mean distance between each house is 38 yards, and between each person 14 yards.

In Towns in Great Britain there are $5\frac{2}{100}$ persons to an acre, and in the Country $5\frac{3}{100}$ acres to a person.

The density of population in the Counties is 120 to a square mile, in Towns 3,337 to a square mile.

London extends over 78,029 acres, and has $30\frac{1}{4}$ persons and about 7 houses to the acre; whilst the population of the Counties and Towns increased 71 per cent. in 50 years, that of the large Towns increased 189 per cent. In watering places, the increase was the largest, viz: $2\frac{561}{1000}$ per cent. per annum. The next largest was in manufacturing Towns, $2\frac{380}{1000}$; next in Sea ports, $2\frac{191}{1000}$; in London, $1\frac{820}{1000}$; and in Country Towns, $1\frac{609}{1000}$ per cent. per annum.

“Great, however, as has been the increase of population in England and Wales during the past 50 years, it is nothing as compared with the Metropolis during that period. In 1801, the population of the Metropolis, taking the same area as in 1851, was 958,863. In March, 1851, it had increased to the enormous amount of 2,361,640, or contained a living mass of human beings equal to the gross population of 14 Counties: Sussex, Berkshire, Hertfordshire, Bucks, Oxfordshire, Huntingdonshire, Northamptonshire, Bedfordshire, Cambridgeshire, Wilts, Dorsetshire, Herefordshire, Rutlandshire and Cumberland. This appears almost incredible, but it is the fact. It contains double the aggregate population of Wales; 297,727 more living beings than are contained in the densely populated Manufacturing County of Lancashire, and one-third more than Yorkshire. But this is not all. During the last 10 years it is without a parallel in the history of the world. Liverpool is justly considered the second City in the Empire, and yet it would take two Liverpools to make up the increase of the population of London from 1841 to 1851. And yet in every nine minutes one person dies in the Metropolis.

“It is impossible to convey to the mind an adequate idea of the living mass congregated in the area of 115 square miles, comprising London. It is really the City of the World, and contains a population equal to the entire kingdom of Denmark, half that of Sweden and Norway, of Portugal, of Belgium, of Holland and of Bavaria; exceeds the population of Hanover, Wurtemberg, Saxony, Tuscany, and Baden.”

Great Britain has 815 Towns of various magnitudes; 580 in England and Wales; 215 in Scotland, and 10 in the Channel Islands. The population of the 815 Towns is 10,556,288; that of the Country, 10,403,189. Small Towns with markets are included in the Country. In fact the Town and Country population differ so little that they may be considered equal. The average population to each Town in Scotland is 6,654 to each Town in England and Wales, 15,501. The Scottish Towns therefore contains less than half the population of the English. (Page 46, Census of Great Britain, 1851.) The English Towns are on an average at a distance of $10\frac{8}{10}$ miles from the centre of one to the centre of the other. The Scotch Towns are $12\frac{7}{10}$ miles apart.

Very few persons being aware of the number of Islands lying around Great Britain, it may be mentioned that there were 175 Islands found inhabited on the morning of the 31st March, 1851, though 500 Islands and Rocks had been numbered. Those of Anglesey, Jersey, Man and Wight, have over 50,000 each; Guernsey has very nearly 30,000, and the whole 175 have a population of 423,000. The area of the Islands in the British Seas is 394 square miles. England has in the average 332 persons to a square mile; Wales 136; Scotland only 92, and the Islands 363, whilst Upper Canada has 29; Lower Canada 4, and in all Canada $7\frac{59}{100}$; Ohio $49\frac{55}{100}$, and all the United States $15\frac{75}{100}$; so that the land even now occupied in Upper Canada would hold more than eleven times its present population, say 11,000,000 inhabitants, to be as densely peopled as England.

W. H.,
Secretary.

APPENDICES TO THE REPORT
OF THE
Board of Registration
AND
STATISTICS.

PERSONAL CENSUS.

QUEBEC, 1852.

- No. 1.—Census of Upper Canada, by Origin. Abstract of same.

NOTE.—We can say nothing reliable of the “*cause of Insanity*” in the individual cases. Instead of a History or Record of each case, there was sometimes no clue even to the name or religion of the patient. Where there exists a tendency, hereditary or otherwise, to disease or disturbance of the functions of the brain, the first exciting cause, whether love, grief, loss or gain of property, religion, intemperance, &c., merely gives a direction or complexion to the form of Insanity.

The “*Nature of Malady*” is extremely various even in the same individual at different times. Of the 153 now under care, 12 are epileptic and dangerous only after an attack, 17 are simply epileptic, and unable to take care of themselves; 22 are unsafe, dangerous, and require constant watching; 47 are depraved and filthy in their habits; 15 are idiotic from birth, or have become so from long continued confinement or disease of the brain. The remainder, 30, labour under many different forms of Insanity.

Most patients with disturbance of the brain are liable to attacks of “*Mania*,” strictly so called; the attack however seldom lasts long.

This Note is signed by Drs. Douglas, Morrin and Frémont.
